

This architectural elevation drawing shows a 16-story building facade. The facade is characterized by a central vertical section featuring a grid of windows, flanked by solid brickwork. The central section is framed by a brick border, and the windows are arranged in a regular pattern. The building has a flat roof with a mechanical penthouse and a ground floor with large glass windows.

This architectural elevation drawing depicts a tall, rectangular building facade. The structure is composed of several distinct vertical sections. The central portion is a large, white-clad area featuring a dense grid of windows, each outlined with a blue frame. This central section is flanked on both sides by wings clad in orange-brown brick, which also contain windows with teal-tinted glass. The base of the building is a grey concrete podium, characterized by larger, more widely spaced windows. The top of the building features a flat roof with a mechanical penthouse or rooftop structure. The drawing uses a clean, illustrative style with clear lines and a limited color palette to represent the building's form and materiality.
